

MURCIALVA

Where Innovation Meets Design

ISSUE 2021

Murcialva stems from a family-owned plywood and timber processing firm founded in 1991. Since its inception, the company has solely focused on supplying high-quality products in more than 70 countries across Europe, America and Asia.

Combined with new and improved technology and machinery, we are able to produce premium quality hardwood floors that are easy to install, sustain and maintain for years to come.

Your home and the spaces within it should be unique to your story, and we want to help you write your story.

We create the finest floors for those who have the finest taste.

MurciAlva

Benefits of adding MurciAlva into your life.

Availability

The most popular wood species from across the globe made accessible to you with our large sales and service network across the country.

Design

Your floor becomes an integral part of your total decor. MurciAlva spoils you with choices with an extensive collection of flooring you can choose from.

Durability

The first and only brand of wooden floors manufactured in the country with the latest technology and unique manufacturing techniques, that help produce the most sustainably sourced product from the finest hardwood trees accompanied by warranties up to 30 years.

As your eyes take in the rich elegance of our floors, your feet will sense a smooth texture underneath with a stunning array of textures and design, our floors don't merely decorate but give your home a classic sheen. As you browse through our catalogue, you'll notice how art and function blend in every pattern. Go ahead, bask in the glow of nature.

A GREEN CONSCIENCE. A CLEAN CONSCIENCE.

Every single offering in the MurciAlva collection is ethically sourced from around the world. Committed towards a sustainable future, MurciAlva makes responsible use of technology. Proper treatment and reuse of fully recyclable waste ensure low carbon footprint

Our technology produces a greener floor with our natural water-based silk oils. The lacquers and stains do not emit any VOCs after installation. Working in harmony with nature, MurciAlva ensures the preservation of nature at every step.

SUSTAINABLE UNMATCHED ELEGANCE

As a leading brand in Canada, MurciAlva is committed to sustainability and always looking for new ways to lessen the impact the flooring industry has on the environment.

INTRODUCING OUR DESIGNER LINES.

We know that flooring is more than an investment; it's a simple solution for transforming any space in your home from something old and worn to something fresh and beautiful.

We also know that, when it comes to flooring, there can be an overwhelming number of products to choose from. Thus we will always take the time to help you select the best product for your home from one of our select flooring collections.

INTRODUCING OUR COMPLETE **ASH** ELEGANTE DESIGNER LINE.

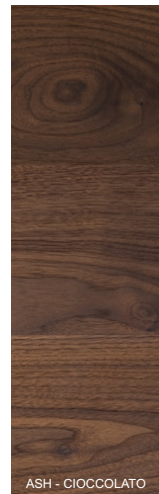

A beautiful assortment of classically **elegant**, **crisp** and contemporary lines that are designed to make a **statement** in any space. The clean grade and long dimensional planks add to its **understated elegance** and luxury. **Élégante Ash** is a true avant-garde in the world of engineered hardwood floors.

right accents in the decoration of your

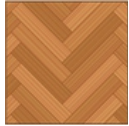

Here's a basic guide on what to keep in mind while selecting your floor

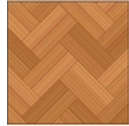

1

Choose Your Design.

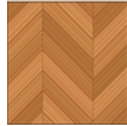

You can choose to go with either Regular Plank Flooring or Parquetry Designs like Herringbone, Double Herringbone, Chevron, Wood-Strip, Brick-Bond, Stack Bond, Checkerboard, Mosaic, Chantilly, Basket Weave, Double Basket Weave or Versailles. You decide, we deliver.

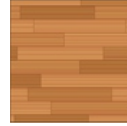

HERRINGBONE

DOUBLE
HERRINGBONE

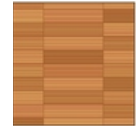

CHEVRON

WOOD STRIP

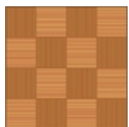

BRICK BOND

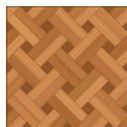

STACK BOND

BASKET
WEAVE

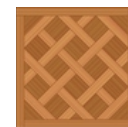

CHECKBOARD

DOUBLE BASKET
WEAVE

CHANTILLY

VERSAILLES

MOSAIC

2

Choose Your Stain.

We are able to customize your choice of floors to any stain that you'd like. You can choose to go as lighter or as darker as you want with any engineered hardwood floor of your choice. Let's say you like a floor but you really wanted the same grains to come in another colour. You choose, we deliver.

3

Choose Your Grade.

SELECT & BETTER GRADE (S&B)

A prime grade tops the list of grading systems in hardwood flooring. Also known as S&B grade, it is the best hardwood flooring as it features minimal colour variations, almost no knots and lower sap content. The boards of hardwood are cut from the centre of the log, thus giving a uniformed look to your floors. It is the highest-end grade of flooring, ideal for places that need a perfectly finished appearance on their floors.

NATURE GRADE (ABC)

Select or ABC grade is the second-best grading of hardwood flooring. It features slightly lower characteristics compared to Prime grade. It contains natural attributes of wood such as small knots and minor colour variations and has longer average plank lengths. These slight milling imperfections can be removed by ordinary sanding. The planks of this grade don't have finishing defects such as streaks, debris, chipping or blisters.

RUSTIC OR CHARACTER GRADE (CD)

Rustic, also referred to as #2 Common grade, shows natural characteristics of wood and colour variations are common. Visible knots, pinholes, darker and lighter boards and shorter board length are the characteristics of Rustic grade hardwood flooring. This grade of flooring is ideal for residential purposes where homeowners want the raw texture of wooden flooring in their homes. There are increased chances of severe milling imperfections being visible such as rotten ends, deeply rooted dirt stains, split ends or shattered pieces.

Choose Your Finish.

LACQUER

Lacquer finish is a UV eggshell lacquer with semi-open pores, extended elasticity and is not subject to the cracking during the seasonal humidity alterations.

UV SILK OIL

UV-oil is an oil eggshell finish. Finish, along with brushing, keeps the natural oak texture. It can be easily renovated and repaired during its lifetime.

5% GLOSS HIGH IMPACT

Hardwax-oil finish has a delicate glittering and preserves the skin-feel characteristics of natural wood. The finish deeply treats the flooring, can be easily renovated and repaired during its lifetime.

Choose Your Width.

Lacquer finish is a UV eggshell lacquer with semi-open pores, extended elasticity and is not subject to the cracking during the seasonal humidity alterations.

WHY MURCIALVA HARDWOOD FLOOR IS THE RIGHT CHOICE FOR YOU?

Whether you're looking for Urban, Chic and Elegant or you're looking for Timeless, Natural and Comfortable - our lines are designed to help you make your vision come to life. Our woodline is sustainably sourced, uniquely crafted, and made custom to your requirements. The wide variety of colours and texture options that we offer coupled with unique surface design and precision craftsmanship makes our collections one of a kind.

We are a Canadian flooring manufacturing company that is known for our designs as well as our quality hardwood floors, sold across North America through authorized dealers. As a trusted manufacturer, our goal is to serve nothing but the best to our clients. We are a one-stop solution for all builders, designers, homeowners, and architects. We aim to provide you with high-quality designer floors that never go out of trend and creates the perfect setting for creating irreplaceable memories at home.

The grains of each layer of our engineered hardwood runs in different directions making it less likely to react to temperature changes and moisture contact, making it a perfect match for any space in your home. We offer natural UV Silk Oil and Low Gloss High Impact Lacquer finishes providing outstanding reliability and durability. You can also choose to go for an authentic, time-worn appearance for your floors with flooring panels delineated with pronounced beveled edges or a seamless, clean-looking appearance with smooth transitioning between planks. We take pride in combining all of these features with ease of installation to present to you, nothing but a winner!

UNMATCHED ELEGANCE

Looking for something contemporary and cozy? These wood floors, tick all the boxes. The variety of colours and textures coupled with unique surface designs, and precision craftsmanship give the entire flooring range a touch of class.

We know that flooring is more than an investment; it's a simple solution for transforming any space in your home from something old and worn to something fresh and beautiful.

MurciAlva is the brand name for the parquet manufactured by a family-owned private company founded in 1991. From the beginning, the main activity of the company was further processing of plywood and timber. At least 95% of our products are produced for customers in more than 72 countries throughout Europe, America and Asia.

The results of the tests made by independent laboratories show that the quality of MurciAlva is on same or higher level compared to other premium parquet manufacturer, particularly in the quality of the finished surface.

Making use of the latest technological advancements enabled the company to manufacture a high quality product from the very beginning.

CERTIFICATIONS

BUEREU VERITAS

All over the globe ISO certification is the sign of reliable quality management and the proof of competitive advantage of the company both on the national and international markets.

FOREST STEWARDSHIP COUNCIL

FSC logo on timber or wood products is a mark of that the product comes from the environmentally appropriate and socially beneficial forestry.

M1 Emission Class The Building Information Foundation RTS

The classification working group set up by Building Information Foundation RTS has been approved.

Miraphen UV-Parquet Coatings

At MurciAlva we take pride in our belief that the surface finish on our boards is not only the toughest in the market for wear and tear but also totally free of imperfections for a truly superior finish.

EUROPEAN FEDERATION OF PARQUET INDUSTRY

The primary goal of FEP is to strengthen and improve the position of wood flooring against other floor covering products as well as to enhance the growth, prosperity and stature of the European parquet manufacturing industry.

MurciAlva is produced by a workforce who exercise great care and are justly proud of their product.

MurciAlva will provide pleasure and enjoyment for many years to come.

MurciAlva showcases the largest selection of engineered wood flooring. Each piece of wood, naturally beautiful is further enhanced using the latest European technology and expert craftsmanship thus bringing out the true character of wood.

MURCIALVA ENGINEERED FLOORING

TWO-LAYER ENGINEERED FLOORING DESIGN

Engineered flooring has two layers: top veneer layer and plywood. The top layer is a fine wood veneer. The veneer thickness, which is 4 mm, allows regrounding the hardwood flooring up to 3-4 times. The flooring substrate is 9-ply crossed hardwood plywood. Only ultra-strong & eco-safe PU adhesives that prevent the flooring delamination under the heavy-duty exploitation are used to glue the top layer to the plywood substrate.

ENGINEERED FLOORING BENEFITS

- **RELIABILITY** - Resistant to humidity changes due to the use of the plywood underlay
- **DURABILITY** - Usage of ultra-strong and elastic PU adhesives and water-proof heavy duty plywood prevent the eventual flooring delamination
- **SIMILAR IN DESIGN TO SOLID FLOORING** - Top sawed layers brings the surface texture closer to the texture of the solid hardwood

FLOORING ADHESIVE

TECHNICAL INFORMATION

MURCIALVA PREMIUM ADHESIVE 1-COMPONENT SILANE-BASED ADHESIVE FOR PARQUET FLOORS

BENEFITS :

- Ready to use does not require preparation or stirring
- Can be easily levelled with a trowel, retains trowel pattern
- Does not contain solvent, odourless.
- Highly adhesive, suitable for any base, does not require priming of the base.
- Fast hardening (flooring can be sanded in 12 hours)
- Moisture-resistant provides an additional base moisture barrier.
- Provides perfect sound and vibration insulation
- High shear strength, good stress compensation of solid hardwood flooring in humidity changing conditions.
- Does not lose its elastic properties in time and temperature change.
- Can be used over underfloor heating systems.

INGREDIENTS :

Silane-modified polyurethane resin, mineral fillers, functional additives

Meets the requirements of DIN EN 14293, CT5 1621-2006, ISO 17178

APPLICATION RANGE :

The adhesive is designed for installation of wood floors: solid, 2- and 3-layer engineered flooring, mosaic and uniblock flooring, industrial flooring, no prole floors, as well as Tongue and groove and Locking system prole flooring. Flooring plank thickness is not limited. Ensures reliable installation of all wood types, including exotic species.

Recommended for installation of pre-finished (Lacquer, Oil or Hardwax) as well as unfinished hardwood flooring.

The adhesive requires no preparations and is ready for use, easy to spread and make even, cures fast.

Recommended for installation of wood floors over radiant flooring heating systems.

ADHESIVE PERFORMANCE CHARACTERISTICS :

Reference :	4670-030000
Packing :	Bucket 15.0 kg:
Density :	~1500 kg/m ³
Hardness :	~60 Shore A
Color :	Yellow-beige paste:
Consumption :	800 – 1300 g/m ² :
Film forming time :	60 min at t=20° C
Fluidity :	Not less than 50 mm, EN 14293 Height of the glue line edge:
Drying time :	
For light loads (Walking) :	8 hours at plus 23° C and the relative humidity of 50 %
For sanding :	12 hours at plus 23° C and the relative humidity of 50 %
Complete Drying :	7 days at plus 23° C and the relative humidity of 50 %
Use Temperature :	from plus 5 °C to plus 25 °C
Shear Strength :	~1.7 MPa at plus 23° C and the relative humidity of 50 %
Tensile Strength :	~1.7 MPa at plus 23° C and the relative humidity of 50 %
Elongation at break :	~100 % at plus 23° C and the relative humidity of 50 %

100% from wood

MurciAlva is fully recyclable. They are produced from renewable resources without damaging our nature. The wood sourced from controlled forests means that after every tree that was cut, there is a new one planted.

We use our raw materials efficiently, almost without any waste. Offcuts are used for packaging and recycled into green energy. External audits and reviews of our environmental management systems are carried out on a regular basis.

M1 certified, no added VOC/Formaldehyde

Flooring industry standards and norms have not been updated for decades and are considerably less strict than M1.

Formaldehyde emissions and VOC can be very dangerous and lead to various diseases. M1 certification guarantees that emissions from MurciAlva are as slow as they are found in the trees in nature, making MurciAlva perfectly safe for your home.

Cleaning and Maintenance

MurciAlva is designed for easy cleaning and maintenance. Simply vacuum clean them regularly and mop up all spills promptly.

Daily cleaning : Use a vacuum cleaner.

Advanced cleaning (recommended 1-2 times a month): Vacuum clean and then sweep them with a slightly humid mop and using universal floor cleaners or a very small amount of warm soapy water. You should only sweep floors after you have cleaned them with a vacuum cleaner, as otherwise, you will sweep dust into the wooden pores.

Floor Heating

MurciAlva is suitable for underfloor heating. The heating system should be adjusted so that the parquet temperature never exceeds +27°C. The maximum variation in temperature should not be more than 5°C within 24 hours.

General Care and Damage Prevention

Please monitor moisture and temperature as set out below and take corrective measures, if necessary. Place doormats on both sides of your front door. Remove any dirt or other abrasives and wipe up liquid spills immediately. If you spill (food or drinks), wipe up with cloth or paper towels to prevent any permanent damage or staining. Protect all furniture with felt pads to avoid any scratching with movement. Avoid wearing high-heeled shoes on the floor, as they can dent or scratch the floor. Close curtains or blinds to limit direct sun exposure. Keep pet's nails trimmed to minimize damage to the surface

CONSTRUCTION HARDWOOD ENGINEERED FLOORING

MurciAlva engineered hardwood flooring features all-wood construction with a dry solid-sawn hardwood wear layer. Enjoy the flawless look of solid hardwood, plus superior engineered performance and greater stability through changing humidity. Only the dry solid-sawn method produces the perfect appearance and superior quality worthy of MurciAlva.

Engineered Hardwood comprises layers of plywood/wood core that are pressed and glued together with a high-quality wood top layer. The grains of each layer of the core run in different directions- as a result, engineered wood is less likely to have moisture problems and expand and contract uncontrollably unlike the construction of traditional wood. This makes engineered wood flooring a great option in rooms that are subject to moisture, like basements, or over concrete slab and radiant heat floor systems.
